8 Tonne Log Splitter, Kinetic

Code #553001

Overview

Specifications

The new Masport log splitter is fast and efficient, utilising the latest in kinetic technology. The electric motor spins twin 9kg (19.8lb) flywheels at 450rpm which store the kinetic energy generated, then release it in a rapid burst of energy through a rack and pinion system once the operator engages the levers. This pushes the log in an extremely fast motion onto the splitting wedge, quickly splitting it in less than 2 seconds, before quickly resetting, ready to split the next log. This is considerably faster when compared to a traditional hydraulic log splitter which may have a 12 second or longer cycle time, making the Masport Kinetic log splitter at least 6 times more productive, giving you more time to enjoy other interests.

- 1600W, 240V motor
- Simple to operate and maintain
- Electric power means less noise and no fumes
- Can also be used indoors or in covered areas
- 350mm (13.75") max log diameter
- 520mm (20.5") max log length
- The ram return is spring loaded making resetting for the next log fast and easy
- Splits most logs in less than 2 seconds
- Rugged wide-stance design provides stability
- Wheels for portability
- Two-handed operation - keeps operator away from moving parts
- 2 Year Warranty
